

10 CUTTING DISCS TCD115

115mm x 1.0mm Thin Cutting Disc

For standard, everyday jobs on all grades of stainless or mild steel and cutting thin metal sheet, car body work and thin-walled profiles opt for a 1mm disc thickness.

These 1mm, thin profile cutting discs cut faster and cleaner and are perfect for efficiently cutting metal with minimum material removal therefore reducing waste and machine wear.

Suitable for all makes of 115mm angle grinders. The ideal cutting disc for the professional.

Cutting discs must never be used for grinding and must always be presented to the work piece at an angle of 90°
